

Presstek PDS-E Recertification Program

Testing and Recalibration

To ensure that your Presstek PDS-E and PDS-ProE density control system is operating to specification, we recommend testing and recalibrating it every 24 months. Presstek provides expert service and recertification to keep your system operating at optimum performance.

If you are unsure of the age of your device, simply check the manufacturing date that is printed on the last page of the user's manual.

The following tasks will be performed during the 24 month preventative maintenance service:

- Complete cleaning and inspection of the instrument
- Check the measurement lamp and replace it if necessary
- A 24 month warranty on exchanged lamps is provided
- Check the absolute white standard
- Internal device calibration
- Install new firmware
- Complete functionality test
- Ensure that the device meets factory specifications

**This complete service
costs only \$1,500**

**To take advantage
of this offer:**

Call Presstek Service and specify the PDS-E recertification program.

We will issue a Return Material Authorization Number (RMA) for your device. When shipping the device to Presstek, please make sure the RMA number is displayed prominently on the shipping container.

Ship the device to:
Presstek, Inc.
55 Executive Drive
Hudson, NH 03051
Attn: Don York RMA #
